

TASK 4

sudo nano service.yaml

Configure port to Jenkins file

```
GNU nano 6.2 service.yaml
apiVersion: v1
kind: Service
metadata: {}
name: my-app
namespace: default
spec:
  type: NodePort # Ensures external access via a specific port
  selector:
    app: my-app
  ports:
    - protocol: TCP
      port: 80 # Service port inside the cluster
      targetPort: 80 # The container's port
      nodePort: 30391 # Externally accessible port
```
